DETAILED ACTION

1. This final office action is in response to the amendment filed 9 November 2007.
2. Claims 1-6 are pending. Claim 1 is independent.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 remain rejected under 35 U.S.C. 102(b) as being anticipated by Wistendahl et al. (US 5798845, patented 13 January 1998, hereafter Wistendahl).

As per independent claim 1, Wistendahl discloses a method of operating a recording device, the method comprising:

Storing a recording on a removable recording medium as commanded by a user of the recording device (column 3, lines 1-23; column 3, lines 38-47; column 9, lines 17-33: Here, a removable recording medium (disk) stores hot spot data specified by an author)

Adding interactivity to the recording as commanded by the user of the recording device (column 9, lines 17-33: Here, an author identifies hot spots to be linked, thereby providing interactivity)

Linking the recording and an interactive module based on the interactivity added to the recording (column 3, lines 1-23; column 9, lines 17-33)

As per dependent claim 2, Wistendahl discloses the method further comprising storing the interactive module on the removable recording medium (column 3, lines 38-47).

As per dependent claim 3, Wistendahl discloses the method further comprising storing an interactive link on the removable recording medium, the interactive link representative of the linking of the recording and the interactive module (column 3, lines 1-23 and 38-47).

As per claims 4-6, the applicant claims the recording device executing the method of claims 1-3 respectively. Claims 4-6 are similarly rejected.

Response to Arguments

5. Applicant's arguments filed 9 November 2007 have been fully considered but they are not persuasive.

The applicant argues that Wistendahl fails to teach adding interactivity to the recording (pages 4-5). The examiner respectfully disagrees. Wistendahl discloses providing interactivity to a recording by hot spotting the recording (column 9, lines 17-33). This requires linking the recording with the interactive module (column 3, lines 1-23). The interactive module (IDM; column 3, lines 24-38) has linkages connected to the recording (Abstract). Therefore, the applicant's argument is not persuasive.

The applicants arguments with respect to claims 2-6 rely upon the arguments presented with respect to claim 1. These arguments are similarly not persuasive.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
